

Walk-through and Community Meeting April 22, 2019 – 6:00 PM

Welcome to a walk-through and community meeting of the Lower 24th Street ficus trees. This is a part of the outreach efforts from San Francisco Public Works to share information about the trees, their condition and our plan for removal and replanting of the ficus along the Lower 24th Street commercial and neighborhood corridor.

Our goal with this and other ficus removals happening throughout the City is to ensure public safety and enhance our urban tree canopy.
