San Francisco Department of Public Works

The Department of Public Works (DPW) will be making improvements to your neighborhood. This work will begin soon. Please look inside for more information regarding street access, work schedule, and street parking. If you have any questions or concerns, please contact us. We thank you for your cooperation and patience during construction.

## Official Notice

from the City and County of San Francisco

# Fire Boat Station #35

Pier 22-1/2, San Francisco

## Community Open House Oct. 3, 2012 at 5:30 p.m.

### Project Description

Fire Boat Station #35 is part of the Earthquake Safety and Emergency Response (ESER I) bond work to renovate or replace selected fire stations. The ESER I bond passed with 79.4 percent approval of San Francisco voters in June 2010. On behalf of the San Francisco Fire Department, the City's Department of Public Works is implementing the bond-funded projects.

The proposed project at Fire Boat Station #35 includes rehabilitation of the existing station building built in 1915; replacement of deteriorated Piers 22-1/2 and 24 to allow for adequate berthing of the fire boats; and construction of a new station to support SFFD operations, which have outgrown the space available in the historic building. These improvements will support SFFD's important fire protection mission on the San Francisco Bay and along the waterfront.

The proposed project is in the early conceptual phase of development.

We welcome and seek community input as we develop the project.

### Looking Ahead

A project of this type requires thoughtful consideration of many relevant (and sometimes seemingly competing) factors, including but not limited to SFFD operations; Port, waterfront, and maritime considerations; environmental, Bay conservation, and water quality priorities; City Planning factors; Civic Design and architectural matters; historic and preservation considerations; public access; and community priorities.

The project team is committed to pursuing the project with the involvement of the community and our partnering government agencies, as the project progresses.

Accordingly we are scheduling a community open house for October 3, 2012 from 5:30 – 6:30 p.m.

Additional forums will be hosted as the project progresses.

**Interested members of the public may also obtain more detailed information as the project progresses at the [www.sfearthquakesafety.org](http://www.sfearthquakesafety.org) website.**
